

# UNCANNY VALLEY - SPRITE SHEET

## Project 1: Digital Archeology Jinhwa Oh

### IDEA 1

There are moving characters or icons on the map, and when you click one of them, you will see a sprite sheet of them. Basically It resembles a video RPG game triggering a nostalgic feeling about our childhood or just the past. The space or map is connected to other spaces so that you can explore the world like a character in a game.

### IDEA 2

It looks like a very general and ordinary webpage that we face everyday (like Facebook, or Twitter) but icons and buttons on the page are changing every moment so that users cannot get the meaning of it and don't know what to do in this website, just except clicking the buttons and icons. When they click on of them, they will encounter spite sheet of it.
